20a. How does the Committee accomplish its purpose?

Section 492 of the PHS Act states that The Secretary...shall by regulation require appropriate technical and scientific peer review of (A) applications...; and (B) biomedical and behavioral research and development contracts.... This committee is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications in the area of neurological disorders and stroke. During this reporting period the committee reviewed 137 applications requesting \$203,808,916 in total direct costs for all years.

20b. How does the Committee balance its membership?

The members are outstanding medical or scientific authorities in academic medicine, basic research, and clinical sciences in neurological disorders such as stroke, epilepsy, multiple sclerosis, amyotrophic lateral sclerosis, Parkinsonism, and head and spinal cord trauma.

20c. How frequent and relevant are the Committee Meetings?

The committee held 9 meetings during this reporting period.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This committee is composed of recognized biomedical and/or research authorities who represent the forefront of research and technical knowledge and who provide first-level merit review of highly scientific and technical research grant applications. These evaluations and recommendations cannot be obtained from other sources because the specialized, complex nature of the applications require a unique balance and breadth of expertise not available on the NIH staff or from other established sources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meetings of the committee were closed to the public for the review of grant applications. Sections 552b(c)(4) and 552b(c)(6) of the Government in the Sunshine Act permit the closing of meetings where discussion could reveal confidential trade secrets or commercial property such as patentable material and personal information, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

21. Remarks

This committee did not produce any public reports during the fiscal year. This committee does not have a public website. Due to the large number of members associated with this committee, NIH staff are unable to provide zip codes for all members. Current individual meeting rosters, including zip codes, are available on line at:

<http://public.era.nih.gov/pubroster>. Past individual meeting rosters are available by contacting the DFO. The DFO and Committee Decision Maker positions are both held by W. Ernest Lyons, Ph.D. He is the Chief, Scientific Review Branch, Division of Extramural Activities,, NINDS. As Branch Chief, he is responsible for overseeing the Scientific Review Officers who administer the Initial Review Group meetings. The following members should not have been included in last year's membership listing as they had all resigned in a previous fiscal year and therefore are not included in this year's report. Nicholas Poolos, Rhonda Voskuhl, Thomas Wisniewski, and Jing Zhang.

NIH Peer Review Committees are involved in the initial review of research grant applications. The NIH dual peer review system is mandated by statute in accordance with section 492 of the Public Health Service Act. The charge to this committee is to determine scientific and technical merit of the individual grants or contracts. These recommendations are forwarded to Federal officials who generally accept the committee's recommendations and favorable applications are then forwarded for the second level of review performed by Institute and Center (IC) National Advisory Councils or Boards. Only applications that are favorably recommended by both the initial peer review committee and the Advisory Council may be recommended for funding.
